The MAILING DATE of this communication app		over she t with th c	orrespondenc addi	ess				
Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status								
1) Responsive to communication(s) filed on <u>07-</u> .	<u>21-03</u> .							
	nis action is no	n-final.						
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims								
4) Claim(s) 1-27 is/are pending in the application.								
4a) Of the above claim(s) is/are withdrawn from consideration.								
5) Claim(s) is/are allowed.								
6)⊠ Claim(s) <u>1-27</u> is/are rejected.								
7) Claim(s) is/are objected to.								
8) Claim(s) are subject to restriction and/o	or election requ	iirement.

## Claim Rejections - 35 USC § 103

1. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art (APA hereinafter, Figures 1-6) in view of Nakahara et al (US 5982470).

APA discloses all except for gate dummy patterns and data dummy patterns.

Nakahara discloses the use dummy patterns within the same context as Applicant's claimed invention yield advantages such as uniform thickness of the seal on four sides, a difference in brightness between a central portion and portion in a vicinity of the seal in the display region can be eliminated. Nakahara shows the dummy patterns having portions formed substantially with the same structure as the bus lines. Therefore, it would have been obvious to one of ordinary skill in the art to employ such dummy patterns for achieving advantages such as uniform thickness of the seal on four sides, a difference in brightness between a central portion and portion in a vicinity of the seal in the display region can be eliminated. Further, it would have been *at least* obvious to one of ordinary skill in the art to manufacture employing same steps such as forming the dummy patterns having the same structure as the bus lines/links for achieving several common reasons in the art such as cost-reduction(effective), ease of manufacturing.

Per claims 2-3, 6-7, 10, 11, 14-15, 18-19 and 22-23, it would have been *at least* obvious to one of ordinary skill in the art to manufacture employing same steps or/and same materials for achieving several common reasons in the art such as cost-reduction(effective).

Application/Control Number: 09/750,246

Art Unit: 2871

2. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art (APA hereinafter, Figures 1-6) in view of Hayakawa et al (US 6172732).

APA discloses all except for gate dummy patterns and data dummy patterns.

Hayakawa discloses the use dummy patterns within the same context as Applicant's claimed invention yield advantages such as an unevenness of liquid crystal cell gap is improved. Hayakawa shows the dummy patterns having portions formed substantially with the same structure as the bus lines. Therefore, it would have been obvious to one of ordinary skill in the art to employ such dummy patterns for achieving advantages such as an unevenness of liquid crystal cell gap is improved. Further, it would have been *at least* obvious to one of ordinary skill in the art to manufacture employing same steps such as forming the dummy patterns having the same structure as the bus lines/links for achieving several common reasons in the art such as cost-reduction(effective), ease of manufacturing.

Per claims 2-3, 6-7, 10, 11, 14-15, 18-19 and 22-23, see detailed explanations above.

## **Contact Information**

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to T. TON whose telephone number is (703) 305-3489. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
